Solanco Parliamentarians Score Upset, Winning Area FFA Title

The eight-man parliamentary procedure team from the Solanco FFA Chapter worked its way from second best in the county last week to first place in the Lancaster-York area this week by defeating the other three chapters competing for the title Thursday night at Penn Manor High School.

In last week's meet, Solanco had finished in the runnerup spot to the perennial champs, Grassland But in doing so, they won the right to compete in the area contest this week, and being number two, they apparently tried hard enough to successfully overcome the best from both cunties in what T. M Malin, area adviser, described as "an extremely close contest all the way through."

The Solanco team will now represent the area when the Region II contest rolls around next week. Region II consists of the 12 counties in southeastern Pennsylvania It they are successful in that event, they will go on to the state meet in late June

Members of the victorious Solanco team included Preston LeFever, president, William Frey, vice-president; David DeLong, secretary, Earl Wenger, treasurer; Gary Craig, sentinel, James Huber, chaplain, Edward Kreider reporter, and Richard Smith adviser

Judging the area event were Charles F Lebo, area adviser Dauphin and Schuyl-

Congressmen Urge Freeman To Retain Milk Handler Pool

The five members of Philadelphia's delegation in Congress have written a joint letter to Secretary of Agriculture Orville L Freeman asking him "to bring to an end the disruptive threat of change which is unsettling milk marketing in Philadelphia and the Delaware Valley milk marketing area." and the Delawaie Valley milk marketing area."

The Congressmen forcefully urged retention of federal milk marketing order #4 in its present form Hearings looking to a change in the order were held by the Department of Agriculture last Fall and a decision has been pending since then

Governor Hears Agr. Committee Reports; Promises Prompt Action

At his second annual conference on agriculture, Tuesday, Governor William W Scranton renewed his commitment to the growth and betterment of Pennsylvania agriculture In accepting the report of the committee on agriculture, which he established one year ago, he thanked the members for their dedicated efforts and instructed Secretary of Agriculture Leland H Bull "to begin an immediate, detailed study of everything you recommend so that specifics may be implemented without delay."

Approximately 225 persons interested in the state's agricultural economy were present at the Scottish Rites Cathedral, Harrisburg, to hear reports on six detailed studies made during the past year.

One report of particular significance was presented by Amos H Funk Millersville R1, on "Competition for Rural Resources." He pointed out that Pennsylvania is losing 15,000 acres of prime farmland each year to the forces of urbanization — highways, recreation, homes, etc. "Current inventory shows we have a bit more than three million acres of cropland and pastures in Class I and Class II land This cannot be greatly reduced if more food is to be produced," Funk said

Merlin Snader Takes Area FFA Public Speaking

In the Future Farmer, Lancaster-York area, public speaking contest which was held Thursday night at Penn Manor High School, it was again a matter of "come-from-behind performance" which won the day, as it was in the procedures contest. Merlin E Snader, a diminutive ninth-grader from the Grassland Chapter, talked his way from third best speaker in the county to first place

Land Judging Won By County FFA Members

Lancaster County members of Future Farmers of America chapters swept the Lancaster-York area Land Use and Management contest Wednesday, which was held this year at the Isaac Geib farm Manheim R3

County youths captured the first 13 places in the event, led by Ronald Kline of Warwick Chapter and Robert Fisher, Grassland, who tied with scores of 346½.

In third place was Robert Eby, Warwick, with 345 points; fourth, Clayton Harrington, Solanco; fifth, Fred Kreider, Solanco.

Weekly Poultry Report

Eastern Pennsylvania And New Jersey
WEEKLY SUMMARY

LIVE HENS

Prices unchanged on light hens. Light offerings in N J. along with irregular supplies in Pa. proved short of full trade requirements. Undertone steady. Heavy hens in adequate supply & fair demand. Prices unchanged to 1c higher. Supplies of roasters very limited Prices paid at farms: Light hens 10-11¾, mostly 10½-11½; heavy hens 18-20, mostly 18½-19c.

TURKEYS

Buying interest dull. Light quantities of small hens & toms brought 30c Occasional offerings of heavies remain unsold.

Fogelsville

April 19, 1966

Hens, Light 8½-11, mostly 10-11; Hens, Heavy 9½-28, mostly 19-24; Pullets 34-45½, mostly 36½-39½; Roasters 32-40; Capons 33-37; Ducks 30-36½; Drakes 18-42, mostly 40½-42; Turkeys, Hens 35-38; Rabbits 42-62, mostly 53-58; Guineas 60-67½; Pigeons (per pair) 57½-1.55, mostly 77½-85; Jumbo Squabs 87½.

Total Coops Sold: 609.

Eastern Shore Exchange
WEEKLY SUMMARY

Broiler and fryer live prices on the Eastern Shore Exchange averaged 15.90 cents per lb. this week, a gain of 6-cent over last weeks' average, and a reversal of the three-week price decline.

Prices paid ranged from a low of 14 5 cents on Monday to a high of 17 2 cents per lb. on Wednesday.

Sales increased by about ¼-million head over last week to continue high at 1 5 million head.

Delmarva

April 22, 1966

Delmarva broiler and fryer live, lot average prices declined from 16 39 to15 95 cents per lb. Demand only fair for heavy auction offerings. Live supplies adequate for needs.

Ready-to-cook demand very good with several plants operating Saturday.

Estimated slaughter for today and Saturday, 865,000 head, compared to 874,000 head last weekend.

In the 24 hours preceding market close on Friday, broiler and fryer prices paid at farms ranged 15 5-16 7 cents per lb. Sales reported totaled 1,073,600 head.

● Chicago

Pennsylvania's Future In Agriculture

A very important second step was officially taken this week in the continuing effort to further the state of agriculture in Pennsylvania.

Governor Scranton's agriculture committee reported on the many factors affecting that area of the state's economy, after having studied the situation and gathered evidence over the past year.

The issue of competition for rural resources in Pennsylvania is a subject of vital concern to every citizen of the state, particularly those who will be involved in agriculture in the coming years. As our population expands, the nonagricultural sector of the economy will require more and more land. Land for houses, for stores, for schools, for recreation, and for highways. The committee studying this problem reported that 15,000 acres of farmland is being lost each year to the pressures of urbanization. In a report delivered by committee chairman Amos H. Funk of Millersville R1, it was recommended that land other than Class I, II, or III, be used for highways and for recreational purposes wherever possible.

As Funk reported, in the long run land will go to its most economical use — if it's worth more for growing houses than for growing food, houses will be the crop. This is an economic fact of life that can not be entirely thwarted, but, as Funk said further, we also have to consider the short run in plotting the use of our natural resources. And in the short run it is important that we lay guidelines which will shape the best development of our state for the long range picture.

These sub-committees have worked hard in meeting the challenge which the Governor threw down a year ago. They have given him many good, hard facts and recommendations. The matter has been deferred to agriculture secretary Bull for further study. It is important that it does not rest there. A good start has been made, but it is only a start. We hope Scranton's, and succeeding administrations, will continue the effort to preserve and improve agriculture in Pennsylvania.

Dirksen Amendment Goes Down Swinging

The anti-reapportionment team of Senator Everett Dirksen came up with a lot of hits but lost the second game of the series to the Senators from Washington this week. Analysis of the defeat says the Dirksen forces left too many [illegible] players on base at the last [illegible]. Although they again failed by seven votes to get the necessary two-thirds majority for an amendment to the U.S. Constitution, which would over-rule the "one-man-one-vote" edict of the Supreme Court, a change of only four votes by the opposition would have carried the day.

Pennsylvania Senators Scott and Clark split, with Clark opposing the amendment. Three Republican Senators from other populated eastern states were also in the enemy camp — Boggs from Delaware; Case, New Jersey; and Javits, New York. Those four Senators alone could have righted the wrong done by the Court to the U.S. Constitution, had they seen fit to do so.

Is this the end of the Dirksen drive to preserve the rights of states? The lion-hearted one says NO. He says his forces will carry the fight to the people all across the land in an effort to defeat the foes of this important measure. Addressing the opposition in the Senate, Dirksen said, "You're afraid to have this issue go before the people (for a vote) and we're going to tell the voters you're afraid of the people".

Hopefully, the Dirksen team will do just that, and, hopefully, the people will vindicate the faith that Everett Dirksen has in them.

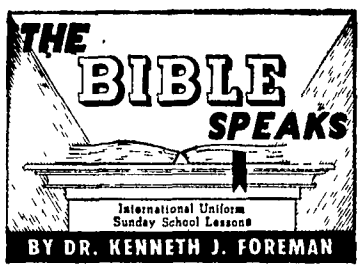
"Zero Tolerance" Concept Doomed

We commented in an editorial in **Lancaster Farming** on October 3, 1964 that the old concept of "zero tolerance" and "no residue" had become meaningless because of the development of highly sensitive techniques for measuring residues. This was the conclusion of the President's science advisory committee. The matter was then turned over to the Food and Drug Administration and Agricultural Research Service for further study.

The latter agencies completed their study last June and recently released findings and recommendations. These amount to a first major step in dumping the whole zero tolerance concept for safe public pesticide use, and legalization of some residues in food crops.

The government has ordered that where a chemical may reasonably be expected to leave a residue in or on food, registration will not be granted until and unless the manufacturer can prove that some of the chemical residue in food is safe for humans. It has ordered the use of many of the questionable chemicals in food products off the market by December 31, 1967.

The Federal Food, Drug and Cosmetic Act which defines the use of the terms "zero tolerance" will have to be changed before the terms can be abandoned, but this appears to be a mere formality.



State Religion

Lesson for April 24, 1966

Background Scripture: 1 Kings 12:25 through 14:20. **Devotional Reading** Proverbs 2:1-9.

State religions are older than the Pharaohs. Wherever in the world you find a particular religion or denomination supported and protected by the state to the exclusion of all others, there is a state religion. Perhaps a state religion is better than none, but this is an arguable point. One thing is sure, the founding fathers of America had seen state churches in action, and they were determined that this kind of religion should never take root in America's free soil.

Dr. Foreman

Even if the founding fathers had never seen state religion in practice, they could have read their Old Testament and learned much by its light. State religion is dangerous because it depends for its success on the character of the man who happens to be the big boss or dictator at the time. Solomon was head of his church as well as of his nation. The same can be said of David, who appointed some of his sons to be priests though (not being Levites) they were not eligible for church office. At any rate, the Jewish people of those times were long used to having the kind of religious observances and worship which the king prescribed. So when a bad king came along, Jeroboam, the masses of the people in Israel followed him without asking questions. If Jeroboam said bull calves were quite all right as objects of worship, then that was all they needed to know. State religions tend to run down hill whenever the government gets into the hands of mean or malicious men. Another reason why state religion is dangerous at worst and low-grade at best is that when religion comes under the control of government it is managed like any other department of the state with the result that religion becomes a branch of politics.

Disaster in Israel

How did religion fare when it got into the hands of that enterprizing young organizer, Jeroboam? After that silly speech by Rehoboam, there was a great uprising among the Israelites and a major secession. Rehoboam found himself only barely holding on to two tribes, while Jeroboam had in his tight grasp all the rest of the nation. He set out to make new centers of worship, and new methods and forms of worship. Disgusting as it seems to us, he actually told the people that the gold-plated calves in the new holy cities of Bethel and Shechem were the gods who had brought their ancestors out of Egypt.

Made Israel to sin

There were good traits in Jeroboam, as the story shows. But his good points were scrubbed out by the bad. Always afterwards, calf-worship would remind people of Jeroboam. The tag that got attached to his name was "who made Israel to sin." He did not force Israel to like the hooves of the gilded calves; he just set the example. Our ancestors used to think it would be one of the joys of the redeemed saints to visit the brink of hell and see there the torture of poor lost souls. More sensitive souls would find the sight intolerable, for one might readily picture a lost soul crying out to the sightseer, "You should be here! You were the first who made me sin!" Could one endure it, even in heaven, if one knew what every one else knew: This is a man who encouraged his brother in sin?

Now Is The Time . . .

By Max Smith, Lancaster County Agent

To Consider Minimum Tillage

When preparing corn ground there are many degrees of tillage that farmers can perform in getting their ground ready; this will range from the plow-plant operation to the farmer who disks and cultipacks his ground several times and get it very fine and firm. The latter practice is being criticized because it is more expensive, breaks down the organic matter more rapid, and decreases the rate absorption rate of the land. On some fields the plow-plant operation might be used successfully, however on most farms a minimum amount of tillage prior to corn planting is suggested.

To Prevent Grass Tetany

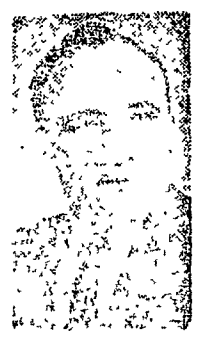
When livestock are turned to pasture for the first time in the spring, [illegible] cover of grass [illegible], or forage poisoning. [illegible] We suggest that animals be accustomed to the lush grass gradually and that both grain feeding and dry matter intake, such as hay or straw, be continued.

To Store Corn Planters

During the next month most of our corn crop will be planted; many bags of seed corn will be found on farms already to go. The corn planters are being put in shape and the tractors are ready to go. Farmers are anxious to get the corn in the ground during early May but should take the time to check the planting distance on the lane or barnyard before they go to the field. Maximum corn population per acre is needed for top yields.

To Store Fertilizer Properly

Fertilizer being held on the farm should be protected from any kind of moisture



SMITH

SAVE YOUR TOES

The whirling knife-edged blade of a rotary lawn mower is dangerous. Choose a mower that is shielded well down toward the ground and treat it as you would a buzz saw. Save your toes.

Weather Forecast

Temperatures for the next seven days are going to average slightly above normal for the period. Warm weather is expected Friday through Sunday. Rainfall is expected to be light to moderate, totaling about one inch. Sunday is seen as the only day during the period in which temperatures may be on the cool side.

Showers over the weekend, and again toward the end of the period, will make the grass grow, and may interfere somewhat with mowing.

Buy Quality In Seeds, Not Price

Consider more than cost when buying seed, according to Dr William Mitchell, extension agronomist at the University of Delaware. Money saved buying inexpensive seed can be a very costly economy if the seed quality is poor

Germination noxious weed seed content and the amount of the seed of the desired variety are considerations that are generally more important than cost alone These quality factors can be easily checked by reading the attached labels

The analysis tag required by law must show the month and year the seed was tested for germination, and the percentage of seed that will germinate The tag must also show the percentage of pure seed of the labeled variety, the percentage of other crop and weed seeds and the number of noxious weed seeds per pound, Mitchell said

When attached to sealed containers, the certified tag is a sure sign to the buyer that this seed has met specific standards as required by law of a state certifying agency, Mitchell points out.

If the seed has been chemically treated, a separate chemical treatment tag must state the name of the chemical used This tag must also specify any necessary safety precautions when handling the seed

Mitchell suggests that before buying seed this spring, a farmer should take the time to read and compare the information on the tags attached to seed containers Seed prices vary; the lowest priced seed may not be the best buy after all.

Further Pesticide Research Announced

HARRISBURG — Research on accumulation of pesticide residue in aquatic plants and animals will be sponsored by the State Department of Agriculture in a project announced this week by Secretary Leland H Bull.

The study, Bull stated, will be conducted by the Delaware Valley College of Science and Agriculture under contract with his department. A long range project, it is expected to require 3 to 5 years to complete.

Purpose of the program will be to determine the effect on aquatic life of three different classes of insecticides — carbamates, organic phosphates, and chlorinated hydrocarbons

Also, to discover the degree of accumulation of these insecticides in selected aquatic form, and to learn whether this concentrated material travels farther in the food chain.

Additionally, the research is expected to show whether there may be an interacting effect whereby combinations of these materials may become toxic even though they are safe individually.

Project leader for the study will be Dr. Ellery W. French, assistant professor of biology He will be assisted by a chemist on the college staff

Secretary Bull said "a better understanding of this problem will permit more intelligent use of insecticides, and will be of benefit to the whole public."

LITITZ-MANHEIM 4-H COMMUNITY CLUB MEETS

By Annette Long, reporter

The Lititz-Manheim 4-H Community Club met April 14 at Lititz Recreation Center with 43 members attending.

Richard E. Dagle gave an interesting and enjoyable talk entitled, "Below the Surface," which is about the adventures of SCUBA diving.

The president, Richard Buckwalter, Lititz R3, appointed a program committee for the next month consisting of Eric Stoner, 1051 Eden Road, Lancaster; Ann Bomberger, Lititz R2; and Larry Walton, Lititz R1. The next meeting will be held at Fairland Elementary School, May 12, featuring a box social.

MANHEIM SEWING CLUB TO REORGANIZE

The Manheim 4-H Sewing Club will hold a reorganization meeting on Monday, May 2nd, at 7:30 p.m. The meeting will be held in the basement of the Manheim Zion Lutheran Church.

The Club members report this is to be an important meeting, and they urge all mothers to attend.

To broil bacon, put single slices of bacon on the broiling rack. Broil about three inches from the heat source. Turn to cook evenly. You'll need to watch carefully so the bacon doesn't get too brown or burn.

Crop & Livestock Round-Up

CATTLE NUMBERS UP

Significant increases in the number of cattle on feed April 1 have been reported in both the state and nation, according to the Pennsylvania Crop Reporting Service.

Cattle and calves being fed for slaughter in the state totaled 77,000, an increase of 15 percent from a year earlier. The total in the nation was 9,556,000 head, 13 percent more than a year earlier.

Marketing of fed cattle in the first quarter of this year was up 7 percent from a year earlier in Pa., and up 6 percent nationally.

Pennsylvania cattlemen expect to market 40,000 fed cattle in the April-June quarter, 18 percent more than in the same quarter last year. In the nation, the total is expected to be 4,752,000 head, approximately 12 percent more than in the April-June period of 1965.

1966 WHEAT CROP PROSPECTS UP

Soil moisture on Pennsylvania farms is "generally more favorable than it has been in the past several years," according to the State Crop Reporting Service.

Fine weather in March permitted extensive plowing and preparation of soil for spring crops, especially in southern counties. Good progress was reported in sowing of oats.

The 1966 wheat crop came through the winter in "unusually good condition" with very little damage. Early indications point to a yield of about 31 bushels per acre, slightly less than last year's record 32 2 bushels.

WAGES TREND HIGHER

Farmers, however, face the prospect of paying higher wages to hired help this year, the Crop Reporting Service noted. The average March rate was reorted as $1 22 an hour, seven cents more than in March a year ago.

PA. WHEAT SIGNUPS

A total of 13,989 Pennsylvania farmers have signed up for participation in the 1966 Federal Wheat Program, according to a report of the U.S. Department of Agriculture.

This represents slightly less than 20 percent of the 71,136 farms in the state on which wheat is grown, and involves 127,546 acres.

MILK PRODUCTION SETS MARCH RECORD

Milk production per cow in Pennsylvania soared to a record 830 pounds in March, 30 pounds higher than the previous March record, according to the State Crop Reporting Service

It was the second time March production per cow topped the 800-pound mark, and only the fifth 800-pound-or-better month in Pennsylvania history. Thirty years ago, March production per cow was only 429 pounds.

The number of milk cows on Pennsylvania farms was estimated at 762,000 in March, down 4,000 from the previous month, and 37,000 less than in March a year ago.

Milk production for the month totaled 632 million pounds, seven million pounds less than a year earlier.

EGG NUMBERS DOWN, PRICES HOLD HIGHER

A total of 267,000,000 eggs were produced in the state in March, 8 percent less than in March 1965.

There were approximately 14.3 million layers in Pennsylvania during the month, compared to 15 1 million a year earlier, and production per layer was down 2 percent. Prices received by farmers for eggs averaged 44 cents, up 11 cents from last year.

● Grange Votes

(Continued from Page 1)

carry out the duties of the County Extension Office. They also favored Senate Joint Resolution #103, the amendment to the U. S. Constitution that will permit the people to decide how their State Legislatures shall be apportioned.

The Fifth Degree will be conferred October 15 at Fulton Grange Hall and will be in charge of: Loran Brinton, Mrs. Joseph Hess, Chester Eby, Mrs. Alfred Wanner, Thomas Galbreath and Mrs. Gyles Brown.

The Lecturer, Miss Helen Wanner, opened the program with group singing followed by a reading, "I Am The Grange." Miss Wanner and Mrs. Charles McSparran conducted a ceremony building the Grange Emblem, giving the life history of the seven founders of the Grange organization Mrs. Charles Davis, Chester County, chairman of the Pennsylvania State Grange Home Economics Committee, gave a talk outlining the projects and contests open to Grange women in the state. Charles Davis spoke about Delaware Valley Milk Order #1. William Buffington, Master of Pomona Grange #3 of Chester and Delaware Counties brought greetings. Mrs Stanley Stauffer Jr. conducted a roll call "What I Would Like to See Improved or Developed in Lancaster County." She also conducted games

Colerain Grange #1667 will be host to the Lancaster County Pomona Grange picnic July 16, 7 p m at the Quarryville Memorial Park. Resolution Committee for that meeting will be Alfred Wanner, Richard Maule and Gyles Brown.

Salisbury Grange will present the program at the meeting of Fulton Grange April 25, and the officers of Colerain Grange will fill the officers' chairs.

AN INVESTOR-OWNED ELECTRIC UTILITY IN THE SERVICE OF THE PUBLIC

Gov. Honors Grange For 99 Years' Service

In Proclaiming Grange Week in Pennsylvania, last week, Governor William W. Scranton cited the Grange for its long time service to the people of Pennsylvania in the following letter:

"The Grange in Pennsylvania and elsewhere has contributed signifi antly to the development of rural America for 99 years.

"American agricultural accomplishments are opening important avenues for international cooperation, through raising levels of nutrition and standards of living for all the peoples of the world.

"The Grange aids realization of international peace and prosperity by its active support of America's role in solving the world food crisis.

"Grange objectives include building character, encouraging education, promoting individual and community responsibility, and fostering sound legislation.

"In recognition of the worthwhile contributions of the Grange, the world's only family farm fraternity, I am pleased to designate the week of April 17-23, 1966, as GRANGE WEEK in Pennsylvania, and I urge all our citizens to cooperate in this observance."

● Governor's Conf.

(Continued from Page 1)

He stated that, projecting the present rate of land competition over the next 20 years, we can expect to see 1.4 million more acres of Pennsylvania land tied up in urban areas, highways, and recreational uses. He stressed the urgency of considering Class III and Class IV land for as much of that use as possible.

Funk also cited his committee's findings on the potential need and supply of water in the state. He said that in response to increasing population pressures, supply and demand will raise food prices to a point where it will become economically feazible to put non-agricultural land into use, often under irrigation. If irrigation in the Susquehanna River Basin is to be used at its full potential it will create water shortages in competitive uses, Funk said. Since we are presently able to use only about 15 percent of the total rainfall, he sees proper storage of rain water as an important key to taking care of agricultural needs in the future.

The natural resources committee further repoited that citizens of Pennsylvania needed to be better informed on the threat of land and water pollution. It "is the most pressing and high cost issue facing rural areas," in the state, Funk said.

A few of the highlights of other committee reports included:

BUSINESS AND CREDIT— the Governor was urged to name a committee to review farm credit facilities, and to devise better liaison between lending agencies so that as farm size and investment continues to increase farmers will be able to obtain vitally needed credit.

EDUCATIONAL NEEDS — greater food production can be achieved only through continuous research, training, and development of facilities such as regional post-high school centers and adult farmer courses. Colleges of agriculture in the U. S., it was pointed out, graduate 7,500 agriculture students annually, when actually twice that many are needed.

PRODUCTION AND MARKETING — to help span this period of transition in agriculture in which labor is scarce and high-priced, and changes in diets and homemaker preferences are altering production and marketing practices, the committee felt the state agriculture department and university should expand their respective research and regulatory efforts.

GOVERNMENTAL ENVIRONMENT — called for more government-citizen cooperation. The food protection function of the department of agriculture should be expanded, and consideration should be given to some constitutional relief from high taxation on farm land.

Snyder, and Harvey Gipe, Jr. In addition to meeting their legislators, the 4-H'ers participated in a Governor's luncheon, observed the executive, legislative and judicial branches of government at work. They also toured the State Capitol, William Penn Memorial Museum, and the Department of Agriculture Building.

● Congressmen Urge

(Continued from Page 1)

"The handler pool, under which milk is supplied Philadelphia by farmers in the Delaware Valley milk marketing area, has served our city well for twenty-three years," the Congressmen said.

"We realize that the Order's minimum price provisions have been violated by some suppliers and handlers, and that these violations prompted your proposal to amend the Order.

"We submit, however, that irrefutable evidence demonstrating that, when your Department seeks enforcement the Federal Courts support you to the fullest, indicates that amendment is not necessary. We are advised, moreover, that the vast majority of suppliers want the Order strictly enforced and to this end have recommended modifications of the present Order to facilitate enforcement."

The five Congressmen — William A. Barrett, Robert N. C. Nix, James A. Byrne, Herman Toll and William J Green, all Democrats, — told the Secretary that they were "particularly impressed with the widespread support for continuation of the present handler pool expressed by Governor Stranton, by both of the United States Senators from our state and by the press of the area." Their mail, they added, "also overwhelmingly calls for retention of Order #4 in its present form, and we note that this view is not only that of farmers and their cooperatives but also of all principal dairies supplying consumers in our constituency."

"Pressure to change the form of marketing pool," they said, "comes from outside the area, and we note with amazement that the principal proponent of change of our Order is a large New York cooperative whose violations are cited as evidence indicating the need for change to conform to their views of what our Order should be.

"Moreover, while consumer prices are not involved in the milk marketing Order we are reliably advised that abandonment of the present handler pool could well result in a sufficient reduction in milk producers' income to warrant their seeking increases which would adversely affect the consumers in our area."

Tossed salad or tossed out?

DITHANE® M-22 SPECIAL WITH ZINC protects your money crops against blights and other diseases The ingredients of a good tossed salad, unfortunately, are highly susceptible to such crop-robbing infections as blights, leaf spots, rusts, anthracnose and downy mildew.

Fortunately, DITHANE M-22 SPECIAL with zinc stops the spread of troublesome fungi promptly—assuring disease-free crops which command top dollar at the market. Apply full cover spray every 7 days or so depending on intensity of attack. DITHANE gives you full value for your crop-protection dollar. See your farm supply dealer today for DITHANE M-22 SPECIAL with zinc.

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

Nutrition Plus With Macaroni, Bread And Cereals

SPENCE

Since each family member needs four servings of whole grain or enriched bread or cereals each week, it's important to make wise choices Bread, rice, cereals or the whole category of macaroni offers a wide choice. In the category of macaroni comes the spaghetti, vermicelli and noodles in all the shapes and sizes. Not all macaroni products are enriched so you need to read the labels. If they are, the nutrients added are iron, thiamine, riboflavin and niacin.

Bread may be either enriched or restored which means those same four ingredients are added. Or it may be fortified with vitamin D.

Cereals, too, may be enriched. Again, read the label to be sure. Some of the sweetened cereals aren't enriched with added nutrients. Others are promoted as extra high in certain nutrients and these are often higher priced.

You don't have to eat a bowl of cereal to get the benefits of its nutrition. Cereals can be added to other foods to make them extra nutritious and delicious.

MOLASSES BRAN COFFEE RING

2 cups all-bran
¾ cup milk
1 egg
½ cup molasses
¼ cup soft shortening
½ cup seedless raisins
1 cup sifted flour
1 teaspoon baking soda
½ teaspoon salt
½ cup sugar
1 tablespoon grated orange rind
¼ cup orange juice

Combine cereal and milk; let stand until most of moisture is taken up, about 5 minutes. Add egg, molasses and shortening; beat well Stir in raisins. Sift together flour, soda and salt. Add to cereal mixture stirring only until combined Mix sugar, orange rind and orange juice; pour into greased 8¼ inch ring mold. Spread batter evenly over mixture. Bake in moderate oven (375 degrees) about 30 minutes. Invert pan and let stand a few minutes before removing. Serve immediately.

NOTE: A greased 8x8-inch baking pan may be used in place of ring mold.

* * * *

THUMBPRINT COOKIES

¾ cup cornflake crumbs
2 cups sifted flour
1 teaspoon baking powder
1 cup soft shortening
1 cup brown sugar, firmly packed
2 eggs
1 cup (6 oz.) butterscotch morsels
½ cup peanut butter

Sift together flour and baking powder. Blend shortening and sugar until light and fluffy. Add eggs; beat well. Add sifted dry ingredients together with butterscotch morsels; mix well. Shape dough into 1-inch balls; roll in cornflake crumbs. Place 1 inch apart on lightly greased baking sheets and make indentation with thumb in the center of each ball. Place about ¼ teaspoon peanut butter in each indentation. Additional cornflake crumbs may be sprinkled over peanut butter. Bake in moderate oven (375 degrees) about 10 minutes. Makes about 3½ dozen cookies.

* * * *

RICE KRISPIES DATE DAINTIES

½ cup sugar
1 cup finely cut, pitted dates
1 teaspoon vanilla flavoring
2 eggs
3 cups rice krispies

Combine sugar, dates and eggs in cold frypan. Cook about 10 minutes over medium heat, stirring constantly, until mixture starts to thicken and sugar is dissolved. Remove from heat. Stir in vanilla and cereal. Dip teaspoon in ice water, then drop teaspoonfuls of mixture onto waxed paper. Chill before serving. Makes 3 dozen balls.

* * * *

SAUCY SPICY TREATS

1 can (1 lb.) applesauce
½ teaspoon cinnamon
⅛ teaspoon nutmeg
6 shredded wheat biscuits

Heat applesauce and spices together in saucepan. Spoon over biscuits. Serve with milk or cream. Makes 6 servings.

* * * *

MARVELOUS MALTED BARS

4 cups puffed rice
24 large marshmallows
3 tablespoons butter or margarine
½ cup natural-flavored instant malted milk
20 caramels
2 tablespoons water
1 cup (6 oz.) semi-sweet chocolate pieces

Heat puffed rice in shallow pan in preheated moderate oven (350 degrees) for 10 minutes. Pour into large greased bowl. Melt marshmallows, butter and malted milk in top of double boiler over hot water. Pour over cereal, stirring until evenly coated. With greased hands, press firmly into greased 7 x 11-inch baking pan.

Melt caramels and water in small saucepan over low heat, stirring frequently. Spread over cereal base. Sprinkle chocolate pieces over hot caramel layer. Place in preheated oven (350 degrees) about 3 minutes; spread chocolate with spatula. Refrigerate until chocolate is set. Cut in bars. Makes 18.

FARM WOMEN GROUP NO. 3 MEETS

Farm Women Society Group No. 3 met recently at the home of Mrs. Samuel Mohler, Ephrata, where they heard Ralph Gamber of the Lancaster County Dutch Apiaries, and a piano selection by Miss Linda Stuber. Mrs. Willis D. Stuber, vice-president, presided.

Among other business it was announced that buses will leave at 5:30 a.m., Saturday, April 23 for a one-day trip to Washington, D. C.

The program committee, consisting of Mrs. Harold S. Stuber, chairman; Mrs. Robert E Gregory, Miss Alva Stuber and Mrs. Edward L. West, recently took the silver-age Society members to luncheon in Reading. After lunch they went to see "The Sound of Music."

The ladies enjoying the day were: Miss Ada S. Royer, Miss Mary N. Royer, Miss Hannah Wissler, Mrs. Carrie Lepole, Mrs. Samuel M. Mohler and Mrs. Harry B. Palm. Mrs. Clarence Stauffer and Mrs. Earl L. Miller were chauffers.

The next meeting was set for May 21 for the Social Room of the Lincoln Lutheran Church.

FARM WOMEN NO. 8 MAKE F&H DONATION

The Society of Farm Women No. 8 met Saturday, April 16, at Musser's Spring House with 28 members and seven guests present. Kathy Brubaker played two piano selections. Henry Libhart showed slides of his paintings and brought some paintings for the members to view.

The Society plans to donate $50 to their county project which is the Farm and Home Foundation. Plans were made to attend the Spring Rally at Dillsburg Thursday, April 21, 1966. Members will bake cookies for the U.S.O. Dance to be held May 14. $25.00 was donated to the Citizenship Scholarship Fund. Homemaker's day at Meadow Hill Dining Room was announced for April 27.

Hostesses were Mrs. Henry Musser, Mrs. Martin Musser, Mrs. Clarence Greider and Mrs. Roy Greider.

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

THOMAS

For You To Try, Broiled Grapefruit

Sprinkle each grapefruit half with sugar and a dash of cinnamon, mace, or nutmeg. Dot with bits of butter or margarine, put the halves in the broiler pan and set on the rack three to four inches from the heat. When the grapefruit is slightly browned and heated through, remove from the broiler and serve at once.

When You Use Any Aerosol Spray

Never spray near fire or flame.

Never smoke while spraying.

Never store container where temperature may go higher than 120 degrees

Never throw an aerosol spray can in the fire, or keep on the range or radiator.

Never puncture a can — this could also cause it to burst.

Some General Rules For Cake Baking

High quality ingredients will yield the best quality product. Use fresh eggs, milk and shortening.

Have ingredients at room temperature Take eggs from the refrigerator long enough before beginning the cake so they have a chance to warm up.

Follow the recipe directions exactly and measure accurately Do not increase, decrease, or substitute basic ingredients, thinking you can improve the recipe. A cake recipe is a carefully balanced formula, scientifically designed and tested to give the best results.

Use the size pans specified in a recipe.

Always preheat oven unless the recipe directs doing otherwise.

Place cake pan as near to the center of the oven as possible and away from the oven sides.

These rules apply, whether making shortening-type cakes leavened with baking powder and/or soda, shortening-type cakes leavened with air, or nonshortening cakes leavened with air.

Hornco Feeds - - - The Growing Choice Of Business Farmers

17,732 lbs. MILK

674 lbs. FAT

This is the 1965 D.H.I.A. herd AVERAGE of Sinking Springs Farms, York County, Penna.

This 62 cow herd has been fed Hornco Uni-Pel Flaked Dairy Feed for 2 years.

HERE ARE THE RECORDS

YEAR	1963	1964	1965	Increase Since Feeding Hornco
LBS. MILK	16,872	17,163	17,732	+860
LBS. FAT	642	632	674	+32
AVG. NO. COWS	59.6	59.3	61.9	—

Congratulations to Sinking Springs Farms and to Mr. Herman Stebbins (Farm Mgr.) for their outstanding achievements.

HORNCO FEEDS

RESULTS LIKE THESE – The reason more dairymen are feeding Hornco Uni-Pel Dairy Feeds than ever before.

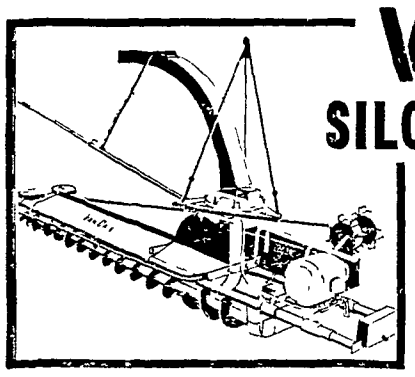
CITIZENS FOR EHRGOOD, ROBERT LESHER, CHAIRMAN

Complete automatic feeding for DAIRY COWS and CATTLE!

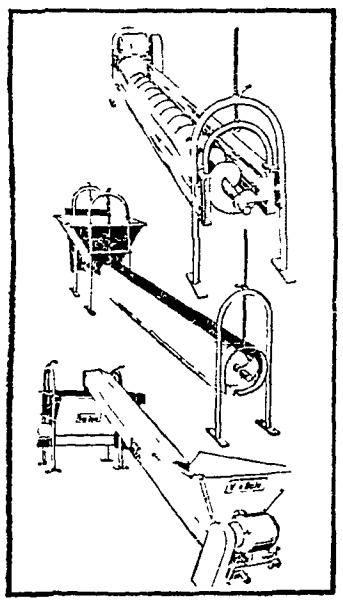


VanDale SILO UNLOADERS

Double augers deliver more silage per minute even when silage is deeply frozen . . and at a lower operating cost Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10, high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9 auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment

DHIA Short Course Set For May 2-13

The Pennsylvania State University recently announced the scheduling of a D.H.I.A. Supervisors Short Course for May 2 to May 13, 1966. The two week course, offered on the University Campus, is designed to train technicians for jobs with Dairy Herd Improvement Associations in the state. Enrollees will be trained in testing milk for buttertat and keeping accurate dairy records.

A number of Associations in the state report vacancies and are seeking graduates for employment.

For admission to the short course, applicants must be able to handle figures accurately. To determine their skill in this, they must satisfactorily complete an entrance test in mathematics at the County Agricultural Extension office, prior to enrollment in the course.

The average farm size in the nation in 1965 was 350 acres, compared to an average of 285 acres in 1959, according to the U. S. Department of Agriculture. Farms in Pennsylvania last year averaged 135 acres.

(Continued from Page 1)

in the two-county area. He spoke on the subject of "The Peace Corps in Action."

Fourteen-year-old Snader is the son of Mr. and Mrs. Lester Snader of East Earl R1, and is in his first year of FFA work.

Richard Thomas, a junior at Penn Manor High School, finished in the runnerup spot, the same position he had held in the county contest a week ago.

Last week's county winner, Larry Herr from the Garden Spot Chapter, dropped to fourth place in the area event. Third place went to Phillip Brant of Red Lion, and fifth to another York Countian, Quay Brown, from South Western. Donald Hershey of Elizabethtown Chapter placed sixth.

Judges for the public speaking contest were: Stanley Musselman, farm representative of the Lancaster County National Bank; Daniel Biemesderfer, assistant superintendent of Lancaster County schools; and Harry Burger, York County assistant superintendent of schools.

Boys finishing in the six positions in Thursday's contest won the right to compete in next week's Region II meet at Millersville State College.

What can a cow say besides, "MOO?"

Quite a bit!
Let's ask one.

Maybe a cow doesn't speak English . . . but she can tell you a good bit! For instance, if she likes the feed you're giving her she eats it . . . all of it. And if that feed helps her to produce more milk, you'll know it when your milk check comes.

We've been watching cows eat Green Pastures Dairy Pellets for years. We know we have a good feed . . . one that cows like . . . and one that produces more milk, too! How much more? Depends on the cow.

Our Dairy Specialist can tell you. Just call 392-2145 and ask. He'll explain why Green Pastures Pellets mean more milk at less cost. And he'll offer assistance in programming, planning, management. He speaks English . . . and he doesn't charge a penny!
